

Test Tag Solutions

Self-Laminating Appliance Test Tags (SL Series)

The vinyl used in this product is a durable, firm, translucent vinyl substrate with an acrylic pressure sensitive adhesive. This material is typically provided in a self-laminating format, which has provision to be used in conjunction with high performance substrates.

Features

- Self-laminating to protect against abrasion
- Tear resistant material
- Oil and moisture resistant
- UV stabilised
- Complete with permanent marking pen
- Resealable packaging
- Unique serial number on each tag

Use

The vinyl selected is an excellent material for wire and cable identification. This vinyl has special properties such as good clarity, conformability and is flame retardant. It is self-laminating and has excellent resistance to water and oil.

Appliance Test Tag Log Book

Electrical Equipment Log Books are designed for easy recording of test results. They feature 100 pages for recording details of appliances and test data. They have a Quick Find Index in the front of the book to allow quick retrieval of information without the need to search through pages and pages of information.

If you operate equipment or machinery that needs to be checked regularly according to Australian Standards, you will need to keep an official log book that can be produced for the inspector on request.

Designed and manufactured in Australia.

QAM-0070 Test Tags Flyer (Revision 1.5) Issued 25 June 2010 / * Denotes colour 'R' = red, 'B' = blue, 'Y' = yellow, 'G' = green, 'O' = orange, etc
